of the Industrial Disputes Act, 1947, the following industrial dispute for adjudication to this Tribunal:

"Whether the transfer of Shri Jyotirmoy Bhattacharjee from Balihari Colliery Co. (P) Ltd. to the Central Office at Industry Colliery is legal and proper, if not, to what relief is he entitled?"

3. The case was taken up for hearing at Calcutta on 1st February, 1963, but on the joint petition of the parties the case was adjourned and fixed for hearing at Dhanbad. The case was then taken up for hearing at Dhanbad on 18th February, 1963, and witnesses were examined and documents were also filed by both sides. But the case was further adjourned, at the request of both the parties, for arguments at Patna, as there was a talk of compromise. At Patna when the case was taken up for hearing on 15th March, 1963, then again a joint petition was filed for adjournment of the case for filing a compromise as the case had not been fully compromised as certain points were yet to be settled. 6. The Reference, accordingly, is disposed of in terms of the said Petition of compromise which is marked Annexure 'A' and made a part of this Award.

7. This is my award which I make and submit to the Central Government under Section 15 of the Act.

TRADE NOTICES

SUBJECT.—*Hydrochloric and Nitric acids manufactured on a Cottage Industry Scale—simplification of Excise formalities.*

S.O. 1686.—It has been decided that in order to simplify the procedure for the storage, accounting and clearance of acids by small scale manufacturers the following procedure should be followed:

- (i) Where small scale manufacturers do not have adequate space for storage of duty paid or non-duty paid acids in separate store rooms they may obtain permission to store acids manufactured by them, and duty paid goods purchased from the market, in the same store room in separate covers/containers which should be properly labelled. They should clear their duty paid as well as non-duty paid goods on their own gate passes/sale memos.
- (ii) They are required to mark the tare weight of the containers on them so that it may be easy to find out at any time the net quantity of the acid in stock.
- (iii) They should maintain a simplified account of the duty paid Sulphuric acid received, consumed and in balance with them.
- (iv) The exempted units are required to maintain simplified R.G. 1 and R.T. 3 in forms (Specimen copies of which are enclosed).

2. The duty paying units, will however, continue to be governed by the standard procedure, which is already in vogue.

SUBJECT.—Yarn.—Cotton Yarn.—Free issue of Trade samples.—Review of the orders issued in the matter.

S.O. 1087.—A reference is invited to the orders contained in this office Trade Notice No. 35/33-144/61, dated the 23rd November, 1961 forwarded under this office C. No. VI(aa) (6)/1/61/40197-220, dated the 16th December 1961.

2. In partial modification of the orders contained in the Trade Notice referred to above, it has been decided that while the quantitative restriction on the clearance of Cotton Yarn/Thread per month per factory (viz. 5 Kgs. of yarn and 2 Kgs. of thread respectively) will continue to be operative, there should be no restriction on individual clearance, but the quantity contained in a sample cleared free of duty per factory should not exceed 5 ounces at a time.

3. A doubt has been expressed as to whether the limits as prescribed can be calculated separately for each variety of yarn. It has been clarified that the quantitative restriction is on the yarn and thread as a whole cleared out of the factory in a month and it should not be computed against each type of yarn.

4. It has also been decided that the term "thread" also includes "Sewing thread" and all other types of thread for the purpose of the above order.
